
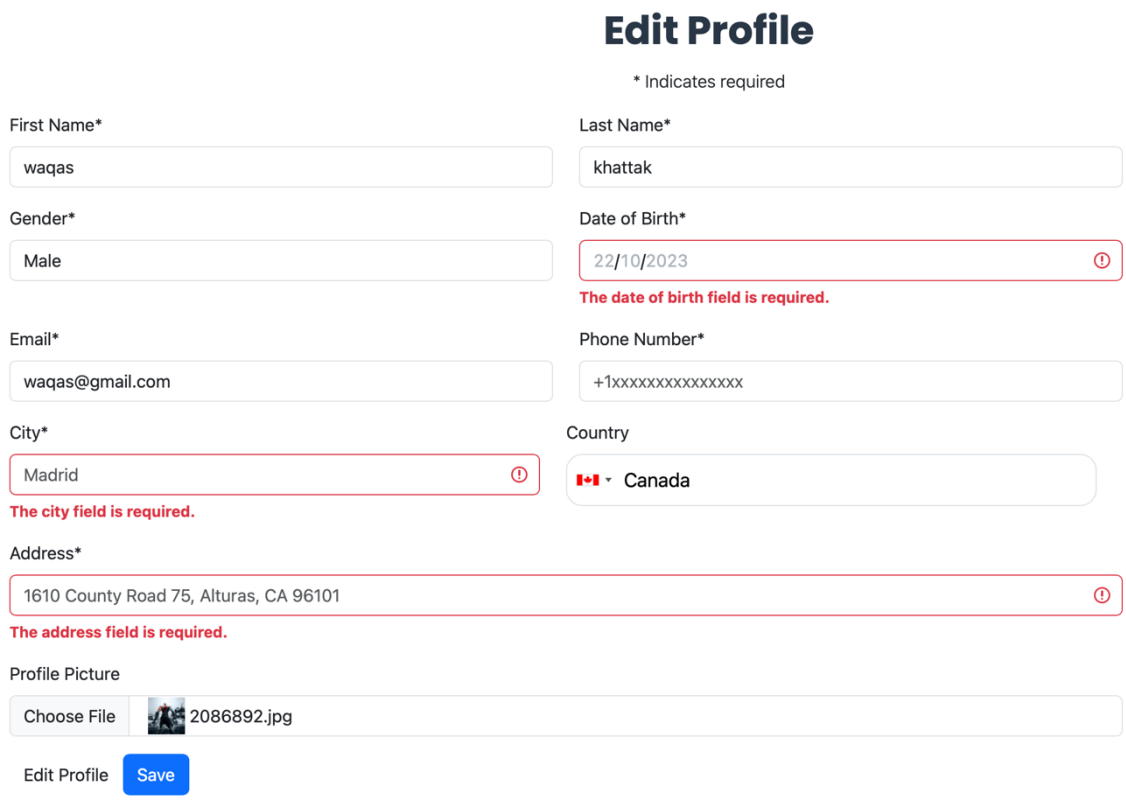
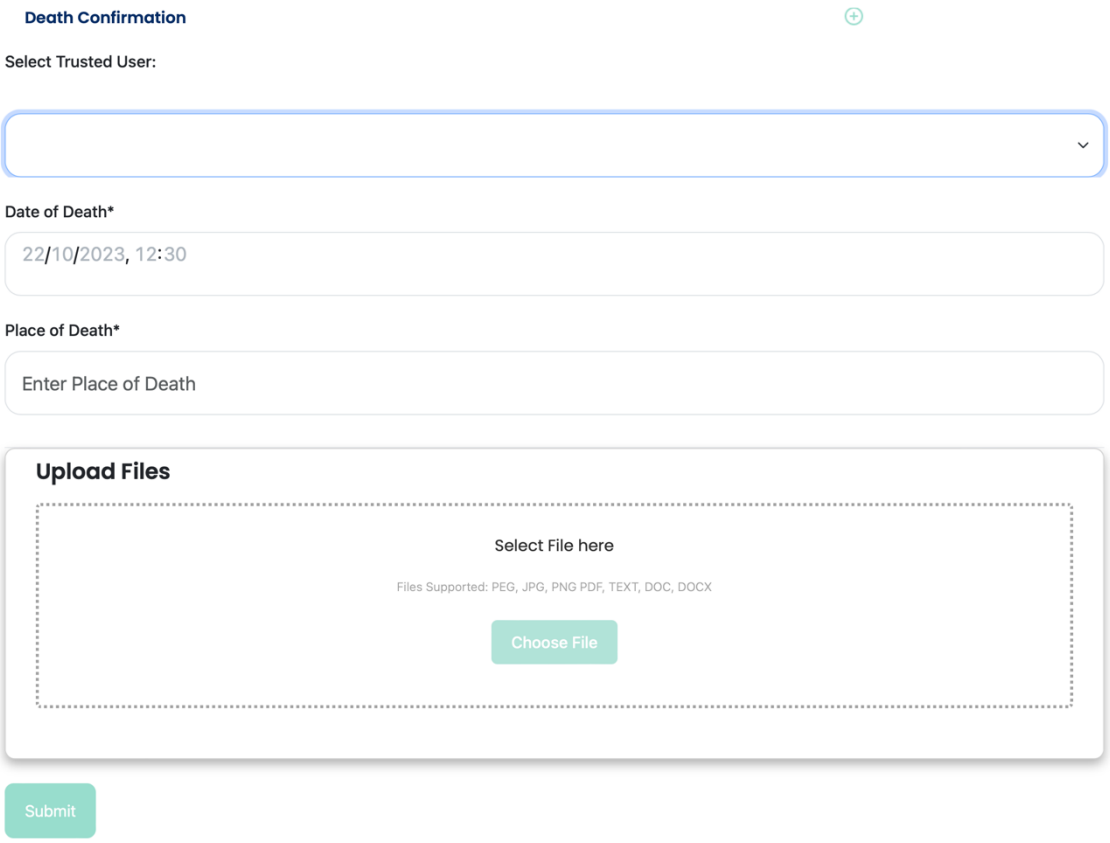
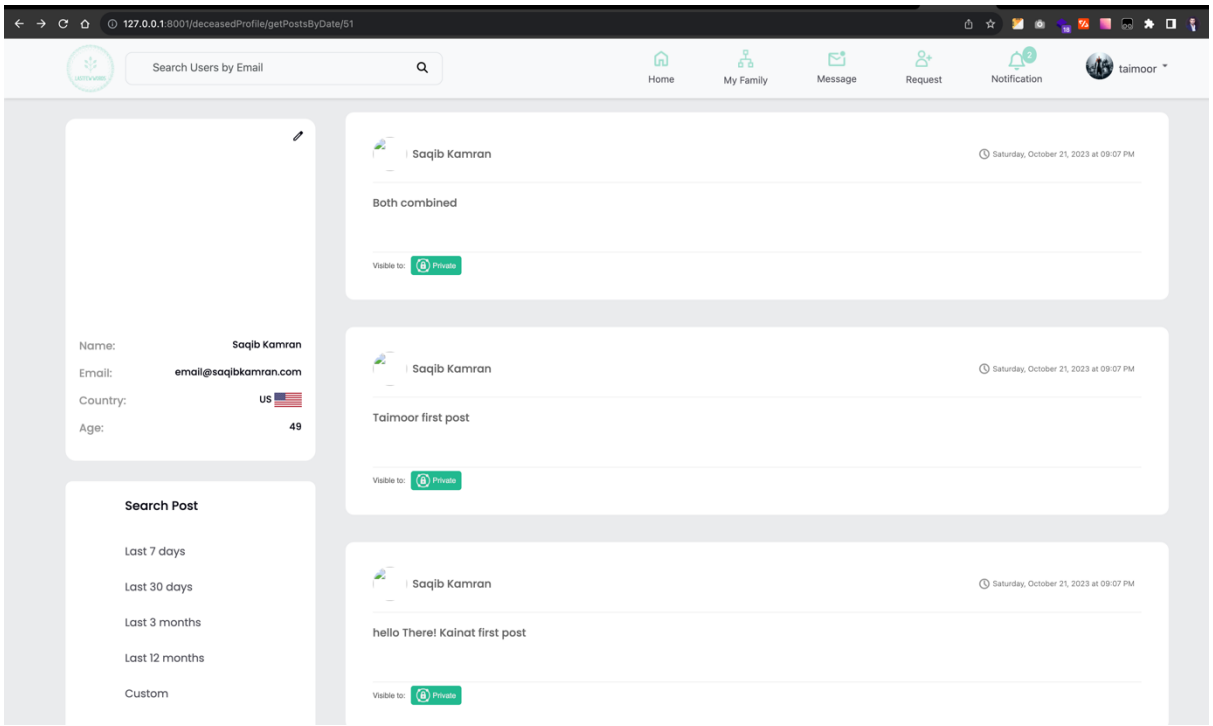
Added as relative but got no notification in the notification dropdown.



If there is any error, submitted data should be retained, and user must only fill the missing data.

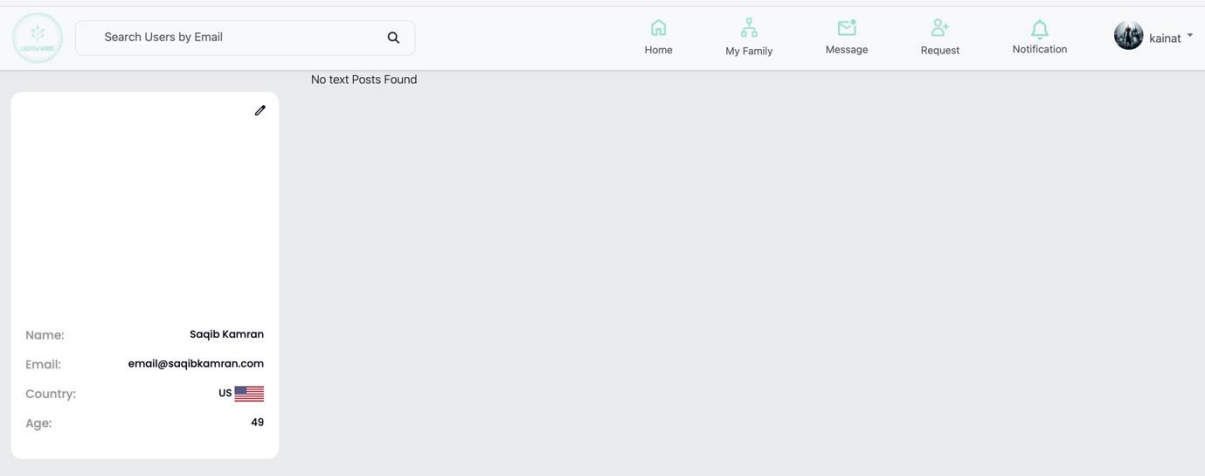


If no one has added a user as trusted contact, then this form should not be visible, instead a message should be displayed that nobody has added you as trusted contact yet.



1. When clicked on Search Post by time (last 7 days, 30 days etc.) it shows the private posts as well.

2. There should not be edit button on the profile (left hand side).



If we could make this “No Text Post Found” message look better.

Instead change this message to: “No Posts Found” and make it in the middle with better presentation.
