## Backend Testing

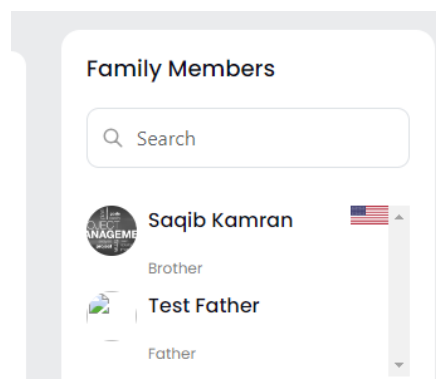

### Task4: Reject Request Button Not working

When a user request to someone for relation then reject button is not working for rejection of relation. (working on Contact Relation Notification **Reject button**)

### Task5: Make the profile visible there in messages section.

Task6: this should be reviewed, this problem is fixed before but now it is not there, this “default pic” for **Test Father** must be there.

Task7: please this when payment is pending then there is no need of 'N/A'.
